

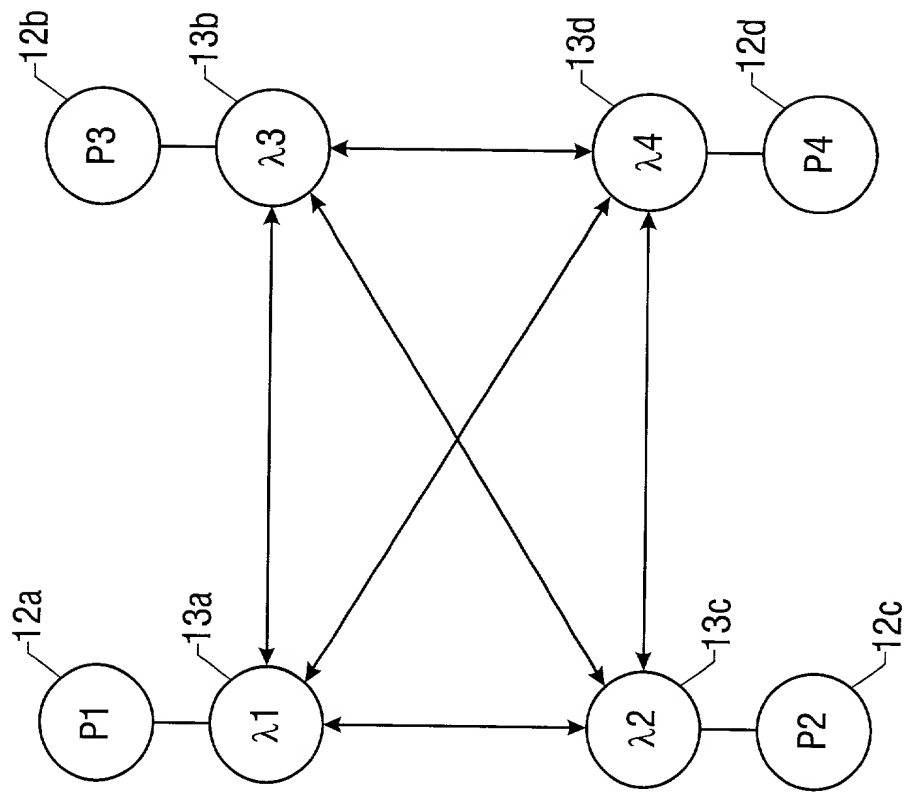

FIG. 1 is a schematic diagram of a network topology. The network topology includes a first set of nodes (P1, P2, P3, P4) and a second set of nodes (λ1, λ2, λ3, λ4). The first set of nodes is connected to the second set of nodes via a first set of links (12a, 12b, 12c, 12d). The second set of nodes is connected to the first set of nodes via a second set of links (13a, 13b, 13c, 13d). The network topology is a fully connected mesh topology.
